Fidel Omondi Otieno – Professional Bio

Fidel Omondi Otieno is a seasoned Full Stack Developer and software engineer with over four years of experience crafting innovative web and mobile solutions. Specializing in both frontend and backend technologies, he is skilled in C#, .NET, React, and Redux, among other tools, delivering scalable and efficient systems tailored to meet diverse client needs. Fidel's expertise extends into Machine Learning (ML) and Artificial Intelligence (AI), leveraging platforms such as TensorFlow, PyTorch, and AWS SageMaker to build intelligent systems that transform data into actionable insights.

In addition to his technical proficiencies, Fidel is a dedicated problem solver and mentor, with a proven track record of leading software development teams to success. His collaborative approach ensures seamless integration of cutting-edge technologies, from blockchain development to big data processing, enabling businesses to stay ahead in a rapidly evolving digital landscape. With a strong foundation in DevOps, UI/UX design, and cloud technologies, he excels in creating user-centric applications backed by robust architecture.

Fidel's academic foundation includes a Bachelor's degree in Software Engineering from Murang'a University of Technology, where he also mentored aspiring developers. His passion for continuous learning and his ability to adapt to emerging trends make him a pivotal contributor to any project or organization striving for technological innovation.

Based in Nairobi, Kenya, Fidel is committed to advancing technology to improve lives and solve complex challenges in creative and impactful ways.
